

1 What is claimed is

2

3 1. A system for debugging in more than one programming language,

4 comprising:

5 means for providing an interface with a debugging frame for each  
6 language; and

7 means for allowing a user to edit each language in a debugging frame.

8 2. A computer-readable medium, comprising:

9 means for providing an interface with a debugging frame for each  
10 language; and

11 means for allowing a user to edit each language in a debugging frame.

12 3. A computer program product for execution by a server computer for  
13 debugging in more than one programming language, comprising:

14 computer code for providing an interface with a debugging frame for  
15 each language; and

16 computer code for allowing a user to edit each language in a  
17 debugging frame.

18 4. A computer system comprising: a processor;

19 object code executed by said processor, said object code configured  
20 to:

21 provide an interface with a debugging frame for each language;

22 and

23 allow a user to edit each language in a debugging frame

24 5. A computer data signal embodied in a transmission medium, comprising:

25 a code segment including instructions to provide an interface with a  
26 debugging frame for each language; and

- 27           a code segment including instructions to allow a user to edit each  
28   language in a debugging frame.
